ICU COMPATIBILITY

✓ = Recommended ✓ = Compatible ✗ = Not Compatible

OVERVIEW

Specifically designed to haul big camera setups, the 80L Shinn is the largest camera bag we've ever created. Co-developed with the Master Cine ICU, the two combine to make the ultimate supersized camera bag for serious shooters hauling large video rigs and super telephoto setups. Featuring an Oxford-weave ripstop nylon and Advanta™ shell, the Shinn offers superb water and abrasion resistance for additional peace of mind when deep en-route with a full load of equipment. A full-size, super-duty suspension system combined with optimized weight distribution from the aluminum frame and ICU provide unsurpassed stability and comfort. As with all Mountain Series packs, the Shinn is fully capable of outer expansion and customization thanks to a variety of strategically placed mounting points.
